## Project Design Phase-II Technology Stack (Architecture & Stack)

| Date          | 23 October 2022                              |  |
|---------------|--|--|
| Team ID       | PNT2022TMID23108                             |  |
| Project Name  | Estimate The Crop Yield Using Data Analytics |  |
| Maximum Marks | 4 Marks                                      |  |

## **Technical Architecture:**

The Deliverable shall include the architectural diagram as below and the information as per the table 1 & table 2

## Guidelines:

- 1. Include all the processes (As an application logic / Technology Block)
- 2. Provide infrastructural demarcation (Local / Cloud)
- 3. Indicate external interfaces (third party API's etc.)
- 4. Indicate Data Storage components / services
- 5. Indicate interface to machine learning models (if applicable)

**Table-1: Components & Technologies:** 

| S.No | Component           | Description                                  | Technology                           |
|------|---------------------|--|--------------------------------------|
| 1.   | User Interface      | How user interacts with application e.g. Web | HTML, CSS, JavaScript / Angular Js / |
|      |                     | UI, Mobile App, Chatbot etc.                 | React Js etc.                        |
| 2.   | Application Logic-1 | Logic for a process in the application       | Java / Python                        |
| 3.   | Application Logic-2 | Logic for a process in the application       | IBM Watson STT service               |
| 4.   | Application Logic-3 | Logic for a process in the application       | IBM Cognos Watson                    |
| 5.   | Cloud Database      | Database Service on Cloud                    | IBM DB2, IBM Cloudant etc.           |
| 6.   | File Storage        | File storage requirements                    | IBM Block Storage or Other Storage   |
|      |                     |  | Service or Local Filesystem          |

**Table-2: Application Characteristics:** 

| S.No | Characteristics          | Description   | Technology   |
|------|--------------------------|---|--|
| 1.   | Open-Source Frameworks   | List the open-source frameworks used                                      | Technology of Opensource framework : Django            |
| 2.   | Security Implementations | List all the security / access controls implemented,use of firewalls etc. | e.g. SHA-256, Encryptions, IAM<br>Controls, OWASP etc. |
| 3.   | Scalable Architecture    | Justify the scalability of architecture (3 – tier, Microservices)         | Technology used : 3-tier                               |
| S.No | Characteristics          | Description   | Technology   |
| 4.   | Availability             | Justify the availability of application / realtime forms                  | Technology used : Distributed servers/marketing        |
| 5.   | Performance              | Design consideration for the performance of the application               | Technology used : IBM Cognos Watson                    |
